Workshop Overview

Before we get into the platform we will use to edit web pages during this workshop, the instructor will provide the following:

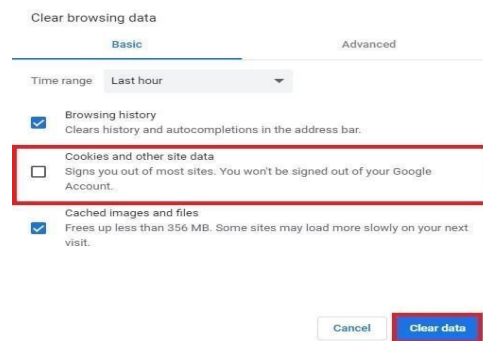

1. An overview of web development including the technologies we will use during today's workshop (HTML, CSS and jQuery).
2. A preview of each step of the process during the 3-hour workshop including the final result.

GitHub Pages Overview and Login Instructions

For this workshop, we are going to use Github Pages to create, edit, and manage HTML, CSS and JavaScript (jQuery) content.

Quick Points

1. Google Chrome is the best browser to use for this workshop.
2. At times you will need to clear the browser cache for changes to appear (CTRL+SHIFT+DEL in Chrome). **IMPORTANT**: In the dialog box, be sure to uncheck the box next to **Clear Cookies and Other Site Data**.
3. Once you clear the cache, you may need to log into Github again. The login info is available in the header of every page throughout this document (after this page).

4. Have fun and be patient – lots of new material and moving parts!

Github Login

1. Go to github.com

2. Sign in with the following username and password:

username: introwebdev101

password: IntroWeb123!@#

3. Once you are signed in, type the following website address in the address bar and click **enter**:

<https://tinyurl.com/restore-may22>

4. Open the folder with your name.

5. Click on the file titled **index.html**

6. Click the small pencil icon above the file content to begin editing the file:

Workshop Files: <https://tinyurl.com/restore-may22>
Your Live Site: <http://introwebdev101.github.io/restore/may/foldername> (all
lowercased)

Username: introwebdev101

Password: IntroWeb123!@#

HTML Updates

Update following content in your index.html document:

<head> section updates

1. Change the content attribute to your name, change the title tag to a page tab title you prefer

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <meta charset='UTF-8'>
5     <meta name='description' content='Intro to Web Workshop'>
6     <meta name='keywords' content='training, introduction, web, development'>
7     <meta name='author' content='Your Name'>
8     <meta name='viewport' content='width=device-width, initial-scale=1.0'>
9
10    <title>Tab Title</title>
11
```

<body> section updates

1. Update the image links on lines 21 and 26:

Current HTML Content:

Line 21-26:

```
<div>
  
  <br/>
  <button id="btn1">Rename Me</button>
  <br/>
</div>
```

Line 28-33:

```
<div>
  
```

Workshop Files: <https://tinyurl.com/restore-may22>
Your Live Site: <http://introwebdev101.github.io/restore/may/foldername> (all
lowercased)

Username: introwebdev101

Password: IntroWeb123!@#

```
<br/>  
<button id="btn1">Rename Me</button>  
<br/>  
</div>
```

Update the **** tags on lines **22** and **29** to refer to an image you prefer.
See info below about how to add an open source image from pexels.com.

How to Add an Open Source Image from pexels.com in **Google Chrome**

1. Go to pexels.com.
2. Search for a photo you like.
3. Right click on the photo and click on “**Copy Image Address**”. **This step is specific to Google Chrome.**
4. Return to index.html and replace the # sign on lines **22** and **29** with the link you copied.

Example:

Original: ``

Updated: `<img src=
'https://images.pexels.com/photos/33109/fallautumn-redseason.jpg?auto=compress&cs=tinysrgb&h=750&w=1260'>`

5. In the address you pasted, **delete** everything in the link after the image extension. In this case, the image extension is .jpg – delete everything after .jpg.

Original pasted link:

Workshop Files: <https://tinyurl.com/restore-may22>
Your Live Site: <http://introwebdev101.github.io/restore/may/foldername> (all
lowercased)

Username: introwebdev101

Password: IntroWeb123!@#

<https://images.pexels.com/photos/33109/fallautumnredseason.jpg?auto=compress&cs=tinysrgb&h=750&w=1260>

6. Scroll to the bottom of the page and click the green Commit Changes button to save your changes.

To view the changes in the browser, type

<http://introwebdev101.github.io/restore/may/foldername> and click enter.

You may need to refresh your browser cache to view changes

(CTRL+SHIFT+DEL)

CSS Updates

1. Return to Github.com. Go to the following address:
<https://tinyurl.com/restore-march>.
2. Open your folder, then open the css folder.
3. Open the '**style.css**' file and click the edit button to make the following updates:

-
1. Add a background to the page: **body { background: url('insert pexels.com link'); background-size: cover; background-repeat: no-repeat; background-position: right top; background-attachment: fixed; }**

2. Resize the images in your index.html file by typing the following info starting on line 1:

Workshop Files: <https://tinyurl.com/restore-may22>
Your Live Site: <http://introwebdev101.github.io/restore/may/foldername> (all
lowercased)

Username: introwebdev101

Password: IntroWeb123!@#

```
div { display: inline-  
      block; margin: 0;  
}
```

```
img {  
  height: 15em;  
  width: 15em;  
  margin: 1em;  
}
```

3. Reshape the buttons, add a background color, and update the text color using hex codes - htmlcolorcodes.com:

```
button { background:  
          #3d33ff;  
          color: #ffffff; border-  
          radius: 2px; margin: 0;  
}
```

4. Change and animate the button colors:

```
@keyframes recolor {  
  to  
    {background: pink;}  
}
```

```
button {  
  border-radius: 10px; animation:  
  recolor 5s infinite alternate; }
```

Workshop Files: <https://tinyurl.com/restore-may22>
Your Live Site: <http://introwebdev101.github.io/restore/may/foldername> (all
lowercased)

Username: introwebdev101

Password: IntroWeb123!@#

```
#btn1 { background:
#3d33ff; color: #fff;
}
#btn2 {
background: red;
color: white;
}
```

jQuery Updates

1. Return to Github.com.
2. Go to the following address: **tinyurl.com/restore-march**.
3. Open your folder.
4. Open the js folder.
5. Open 'script.js' and click the edit link then add the following content beginning on line 2 (excluding content in **bold**): **The following script will change the images on your index.html page to circles:**

```
$("#img").click(function(){
    $("#img").css({"border-radius":"10em"});
});
```

The following script will make a popup appear when you click anywhere on the page:

```
$("#body").click(function(){
alert("You clicked somewhere on
the page.");
});
```

Workshop Files: <https://tinyurl.com/restore-may22>
Your Live Site: <http://introwebdev101.github.io/restore/may/foldername> (all
lowercased)

Username: introwebdev101

Password: IntroWeb123!@#

The following script will make the image borders square when you click the Button 1 button:

```
$("#btn").click(function(){  
    $("img").css({"border-radius":"0px"});  
});
```

The following script will alternate hiding and showing the image on the page when you click the 'hide' button:

```
$("#btn").click(function(){  
    $("img").toggle();  
});
```

Workshop Files: <https://tinyurl.com/restore-may22>
Your Live Site: <http://introwebdev101.github.io/restore/may/foldername> (all
lowercased)

Username: introwebdev101

Password: IntroWeb123!@#

Full jQuery Script

```
$(document).ready(function() {  
    $("#img").click(function(){  
        $("#img").css({"border-radius":"10em"});  
    });  
  
    $("#body").click(function(){  
        alert("You clicked somewhere on  
        the page.");  
    });  
  
    $("#btn1").click(function(){  
        $("#img").css({"border-radius":"0px"});  
    });  
  
    $("#btn2").click(function(){  
        $("#img").toggle();  
    });
```

To view the changes in the browser, type

<http://introwebdev101.github.io/restore/may/foldername> and click enter

Workshop Files: <https://tinyurl.com/restore-may22>
Your Live Site: <http://introwebdev101.github.io/restore/may/foldername> (all
lowercased)

Username: introwebdev101

Password: IntroWeb123!@#
