Hosts static websites

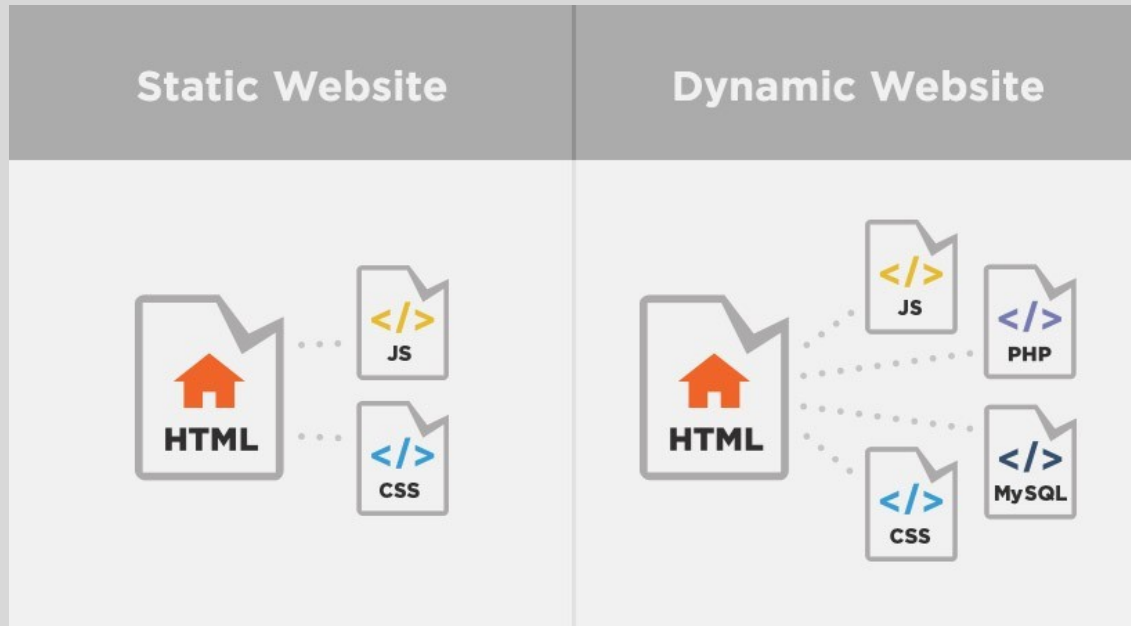

Image source: <https://www.pluralsight.com/blog/creative-professional/static-dynamic-websites-theres-difference>

- Static sites includes sites where nothing changes on the page unless the site developer changes it.
- Example to the left:
 - HTML, CSS and JavaScript (JS) pages are known as static pages
 - Pages with PHP and MySQL, for example, are dynamic because content on the page can be changed by the user – think comments on blog posts, user log ins, etc.

Getting started with GitHub Pages

You can set up a basic GitHub Pages site for yourself, your organization, or your project.

GitHub Pages is available in public repositories with GitHub Free and GitHub Free for organizations, and in public and private repositories with GitHub Pro, GitHub Team, GitHub Enterprise Cloud, and GitHub Enterprise Server.

- [About GitHub Pages](#)
- [Creating a GitHub Pages site](#)
- [Configuring a publishing source for your GitHub Pages site](#)
- [Creating a custom 404 page for your GitHub Pages site](#)
- [Unpublishing a GitHub Pages site](#)

After today...

You will have continued access to files. If you run into an issue with accessing content, please contact me.

You can also setup your own GitHub account and GitHub Pages website. Follow instructions at the following link: <https://docs.github.com/en/enterprise-server@3.1/pages/getting-started-with-github-pages>
